SUMMARY

Computer Science graduate (VIT Chennai, 2025) with hands-on experience building full-stack web applications using React, Next.js, Node.js, Flask. Experienced in developing REST APIs, authentication systems, responsive user interfaces, with additional exposure to applied machine learning. AWS Certified Cloud Practitioner seeking Software Engineering and Full-Stack/Frontend roles.

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Flask, Tailwind CSS, Bootstrap, EJS, Leaflet.js

Databases & Cloud: MongoDB, MySQL, AWS, Render, Cloudinary

Developer Tools: Git, GitHub

ML / Data: Supervised Learning, Feature Engineering, Model Evaluation, EDA, MySQL

Core Concepts: Data Structures & Algorithms, OOP, REST APIs, Authentication, Session Management, MVC, SDLC

EDUCATION

Vellore Institute of Technology, Chennai

2021 – 2025

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.91

EXPERIENCE

SaaS Developer — FuseCake

Remote | Aug 2026 – Sep 2026

React.js · Next.js · TypeScript · Tailwind CSS

- Developed an Events Discovery feature using React, Next.js and TypeScript, enabling users to explore startup events with detailed information on dates, locations, organizers, pricing and categories.
- Implemented search, filtering and curated event sections for discovering events by keyword, city, category, online/offline mode and price.
- Built dedicated event detail pages and authentication-gated registration flows, returning users to the event after sign-in/sign-up before redirecting them to the official registration platform.
- Developed reusable, component-based UI for event cards, filters, event sections and registration modals while integrating the feature into an existing Next.js codebase.

Full Stack Intern — Ethnus

Remote | Aug 2023 – Nov 2023

- Built and deployed a full-stack blogging platform using the **MERN stack**, implementing user authentication, post management and role-based access control.
- Delivered **4+ React/Node.js projects** across a 4-month internship, following the software development lifecycle from implementation through deployment.
- Developed reusable React components and **RESTful APIs with Express.js**, integrating MongoDB for persistent data storage.

PROJECTS

WanderLust – Full-Stack Airbnb Clone

Node.js · Express.js · MongoDB · EJS

Scalable Airbnb clone enabling property listing, booking, reviews, authentication, and location-based search.

- Developed a modular full-stack Airbnb clone using Node.js, Express.js, EJS, SQL and MVC architecture with RESTful APIs.
- Created MongoDB schemas with Mongoose references for Users, Listings, Reviews, and Bookings, enabling structured relational data modeling.
- Implemented Passport.js authentication, HTTP-only sessions with connect-mongo, Joi validation, and Helmet security headers.
- Integrated Cloudinary for image storage and OpenStreetMap Nominatim + Leaflet.js for geocoding and interactive maps.
- Embedded clickable production link:
<https://bnbclone-x8tw.onrender.com/>

FoodPlay – Personalized Meal Recommendation Web App

Flask · JavaScript · HTML/CSS

Nutrition-aware diet planner that generates customized meal plans based on individual fitness goals and activity data.

<https://github.com/rahul0037a/FoodPlay>

- Engineered a BMR/TDEE calculation engine integrating user inputs (weight, height, activity level, fitness goal) to produce daily macro targets.
- Built a preference collection system supporting dietary restrictions, goal types (cut/bulk/maintain), and cuisine preferences — serving 50+ test users.
- Developed end-to-end Flask REST backend and a responsive JS frontend; deployed on Render (free tier).

Blog Blitz – Team Blogging Platform

HTML · CSS · JavaScript

Collaborative blogging website built as a team project during the internship.

<https://blog-blitz-iefe.vercel.app/>

- Owned the UI/UX layer, developing responsive mobile-first layouts and reusable components across 8+ pages.
- Collaborated with 3 teammates using Git-based branch workflows and pull-request reviews.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Valid - Aug 2027

Supervised Machine Learning: Regression & Classification — Coursera / Stanford Online (Andrew Ng) Jan 2025

MERN Full Stack Intern Certificate — Ethnus

Nov 2023
